## WELCOME

The **Law Enforcement Services Portal** (LESP) is a new initiative of the National Center for Missing & Exploited Children (NCMEC). The LESP allows registered users (active law enforcement and prosecutors only) to directly access resources of NCMEC's Exploited Children Division. You must be an active law enforcement officer or prosecutor in order to become a registered user.

NCMEC will continually expand the services of the LESP over the next year so please keep checking back to see what additional tools are available.

For those who have not worked with the Exploited Children Division before, NCMEC operates two central programs that focus exclusively on the victimization of children through the production, distribution, and possession of child pornography: the **CyberTipline** and the **Child Victim Identification Program** (CVIP).

The **CyberTipline** operates a national clearinghouse for tips and leads relating to child sexual exploitation. The CyberTipline launched in 1998 and is authorized by Congress to create a reporting mechanism for members of the public, law enforcement, and certain corporate entities, including electronic service providers that have statutory reporting obligations to report to the National Center for Missing & Exploited Children instances of child sexual exploitation, including child pornography.

The CyberTipline is staffed 24 hours a day, 7 days a week. Reports are continuously prioritized, reviewed, and made available to law enforcement. The CyberTipline also offers tremendous additional resources to law enforcement and prosecutors. To reach the CyberTipline staff, please email: [ecuassistance@ncmec.org](mailto:ecuassistance@ncmec.org).

Since 2002, the National Center for Missing & Exploited Children has operated the **Child Victim Identification Program**, which has a dual mission: (1) to assist federal and state law enforcement agencies and prosecutors with child pornography investigations and prosecutions; and (2) to assist law enforcement in identifying child victims so that they can be rescued from abusive situations. CVIP analysts assist law enforcement with child pornography cases by reviewing collections of child pornography seized from offenders to determine which images contain child victims previously identified by law enforcement. CVIP offers numerous additional resources to law enforcement and prosecutors. To reach the CVIP staff, please email: [cvip@ncmec.org](mailto:cvip@ncmec.org).
